The Rotor / Stator principle for dispersing and homogenizing equipment, originally invented by KINEMATICA, has become the worldwide accepted standard for homogenizing and dispersing a solid, fluid or gaseous phase into a fluid phase.

KINEMATICA Rotor / Stator homogenizers successfully process emulsions, suspensions and foams by reducing the size of solid particles, droplets and gas bubbles to a few microns or less. Small and large amounts of product are being dispersed in a more economical, faster and better way than with any other device.

What sets KINEMATICA apart:

– surplus customer value by professional advice - over 40 years of application knowledge and lead quality - ISO 9001 certified
– continuous improvements in the dispersing technology
– cooperation with scientists from Switzerland, Austria, Germany, China, Japan and USA for specific applications
– excellent quality solutions for dispersing applications in the chemical, biochemical, pharmaceutical, cosmetic and food industry
– leading specialist and manufacturer for homogenizers from lab to pilot plant and production with volumes from 0.05 ml up to 10’000 l and 10 l/min up to 150’000 l/h
– results from the lab can be scaled-up to pilot plant and production
– equipment can be built 100% to customer and product specifications including IQ and OQ

KINEMATICA offers also complete processing systems to customer and product specifications including premix vessels, piping, pumps, stirrers, processing tanks and electronic regulators. The advantage is to get a whole plant out of one hand and ready-to-plug-in. The different parts will be well suited to customer wishes.

The solution for your homogenizing, dispersing, emulsifying, suspending, size reduction, wet milling, powder induction and foam producing application is offered by KINEMATICA.

For further information, a quotation or a personal demonstration just get in contact with us or fill-in our applications questionnaire on the web and send it back to us.

Our staff will be glad to assist you!
**SERIES PT**

**for batch emulsions / suspensions**

- Dispersing of smallest amounts of plant, animal or human tissues in liquid e.g. for RNA extraction
- Sample preparation
- Wet milling and dispersing of solids, fibers, stringy materials, tissues, cells into fluids and polymers
- Extractions
- Breaking up of tablets for QC and further more ...

**SERIES MT (-V/-VP/-FM)**

**for finest inline emulsions / suspensions / dispersions**

- Dispersing and mixing of coarse solids into liquid
- Producing of finest emulsions and suspensions with finest droplet and particle sizes
- Intensive Mixing
- Gassing of fluids
- Special versions for foam production (MT-FM)
- Special versions for powder induction (MT-VP) and further more ...

**SERIES RT**

**complete dispersing systems**

- Producing cremes, lotions, emulsions
- Pharmaceutical or cosmetical products
- Wet milling and dispersing of solids, fibers, stringy materials, tissues, cells into fluids and polymers
- Extracting enzymes from biomasses and further more ...

**SERIES PX (-SR/-MFC)**

**for mixing and stirring for dry milling**

- Basic stirring and mixing tasks in the lab (PX-SR) and further more ...
- Dry milling / grinding of dried, non-fatty, hard and brittle (cereals, beans, bones, stone,...) or stringy and ductile (wood, straw, fibres,...) products (PX-MFC) and further more ...

**SERIES MB**

**for mixing and homogenizing**

- Mixing, dispersing, homogenizing, emulsifying and size reduction of cuttable materials and further more ...
POLYTRON® batch homogenizer for lab and pilot plant cover working volumes from about 0.1 ml up to about 50 liters. Basic models up to electronically controlled drive systems with computer interfaces are available and handle reliable different dispersing tasks.

The batch homogenizers are classified into lab handheld, small, medium and large benchtop units and pilot plant versions.

All POLYTRON® homogenizers to convince with the following features:

- quick coupling for the dispersing aggregates
- powerful and safe drive systems
- high speed levels / extreme high tip speeds
- intelligent regulations and / or controllers
- digital displays or readble scales
- long working life

From over 40 different and exchangeable POLYTRON® dispersing aggregates the optimum for each specific homogenizing application can be chosen.

The efficiency of POLYTRON® dispersing aggregates is unrivalled until now. Thanks to optimized shear forces and bounce effects the processed medium will be treated at finest level in short est time.

POLYTRON® dispersing aggregates with EC design (standard) can be dis assembled with effortless ease, are easily cleaned and can be sterilised / autoclaved according to all current methods.

POLYTRON® Generator (PTG)

PTG 7/2 Standard generator rotor/stator with one teeth row each
PTG 12/2 Standard generator rotor/stator with one teeth row each
PTG 20/2 Special W-Generator rotor/stator with one teeth row each
PTG 20/2M Special M-Generator rotor/stator with one teeth row each
PTG 30/2Z Special Z-Generator rotor/stator with one teeth row each

Maximum Tip Speed 6 m/s
Working volume 0.1 - 5 ml
0.3 - 250 ml
3 - 250 ml
20 - 2000 ml
20 - 2000 ml
100 - 4000 ml

Applications:
- Dispersing cells and tissues in a small amount of liquid
- Dissolving solids
- Extractions
- Dispersing plant, human or animal tissues, resin and pigments
- Dissolving solids
- Extractions
- Producing suspensions and emulsions
- Dispersing plant, human or animal tissues, resin and pigments
- Dissolving solids
- Extractions
- Producing suspensions and emulsions
- Dispersing and mixing particles up to 10 mm in size
- Sample preparation for extractions and solution organic material
- Intensive mixing
- Rotor with knife facilitate the processing larger cell tissue samples or particles
- Dispersing fibrous, stringy and brittle samples (e.g. flesh)
- Breaking open and dispersing pills, capsules and hard large grains

Further Descriptions / Options

1 handheld Homogenizer Lab 8 Digital display
2 Benchtop Homogenizer Lab „small“ 9 Quick Coupling type E for Dispensing Aggregates
3 Benchtop Homogenizer Lab „medium“ 10 Quick Coupling type F for Dispensing Aggregates (also Dispensing Aggregates with coupling type B can be connected)
4 Benchtop Homogenizer Lab „large“ 11 Dispersing aggregate in EC design; easily disassembled and cleaned or sterilized
5 Pilot Plant Batch Homogenizer 12 Dispersing aggregates / shafts available as C (PT-C series) design for CIP
6 ATEX versions available (standard IIG-T3 - Zone 1) 13 Dispersing aggregates available with mechanical seal systems for pressure and/or vacuum applications
7 PC connection and User Interface Software available 14 Special shaft lengths possible

Technical specification is indicative.

POLYTRON® PT 4000

- Suitable for PC’s using MS-Windows XP, Vista, Windows 7 & 8
- Possibility of data logging into MS-Excel-sheets for all parameters
- Programmable Speed-Time-Profiles for automatic operation
- Programmable temperature limits for use as stopping criteria to avoid product overheating
- Graphical parameter visualization in time-based diagram
- Written parameter visualization in text boxes
- Drive health and status is displayed
- Available for PT 3100 D, PT 6100 D and PT 1300 D

POLYTRON® PT 10-35 GT

- Standard modell, available for system
- rotor/stator with one teeth row each
- Preparing of samples for extraction and decomposition of organic material

POLYTRON® PT 3100 D

- Intensive mixing
- Suspending, crushing, wet milling, extracting
- Dispersing and mixing of particles in liquids

KINEMATICA offers a complete series of batch working homogenizers suitable for volumes from 0.05 ml up to 10'000 liters.

Test results obtained with lab units can be used as a reliable data source for a scale-up step to the larger POLYTRON® pilot plant and production machines.

The selection of the right dispersing aggregate and the right drive system depends on the application: treated medium, viscosity, processing time, volume, etc. KINEMATICA don’t leave you alone with these difficult questions. Our applications team would like to discuss with you the right system components for successful working in accordance to a filled-in questionnaire or a test run in our laboratory.

A short overview about available dispersing aggregates and systems shall give you a first information.

### Dispersing and Mixing of Particles

- Dispersing and mixing of particles up to 25 mm in size
- Sample preparation for extraction and solution of organic material
- Intensive mixing
- Rotor with knives facilitate the processing of larger cell tissue samples or particles
- Fast mixing and homogenizing of solid material into fluid by means of a dissolving disk
- Preparing highly viscous products
- Dispersing and mixing of particles up to 30 mm in size
- Sample preparation for extraction and solution of organic material
- Intensive mixing
- Dispersing of fibrous, stringy and brittle samples (e.g. flesh)
- Dispersing and mixing of particles up to 30 mm in size
- Sample preparation for extraction and solution of organic material
- Intensive mixing
- Rotor with knives facilitate the processing of larger cell tissue samples or particles
- Extractions
- Making finest emulsions and suspensions
- Mixes and reduces highly intensive solids into fluids
- Gasises solutions
- Separates fibres and cellular material into very small particles
- Extractions
With the type series MEGATRON® MT and MEGATRON® MT-V KINEMATICA has set standards once more for the inline homogenizing technology regarding efficiency, safe operation and long working life of the machinery for a broad application area within almost every industry field. The MEGATRON® family can be divided into three branches with high, medium and low shear rates. With decades of experience KINEMATICA can be your reliable partner and advisor on choosing the right level of shear rate for your application and product.

Inline homogenizer for pilot plant and production:

- Throughputs from 50 l/h up to approx. 150'000 l/h
- High speed levels and tip speeds up to approx. 50 m/s
- Adjustable drive systems with power levels between approx. 0.8 kW and 110 kW
- Dispersing generators with rotor diameters between 15 mm and 300 mm; with fineness steps from coarse to medium to fine for reaching particle sizes within the lowest micrometer range respective the upper nano meter range depending on the properties of the treated products
- Vertically or horizontally installed single- or multi-staged working chambers
- Single or double acting mechanical sealing systems including supply systems
- Sterile versions, as well as CIP / SIP, 3A and ATEX versions can be supplied
- Product wetted parts made from high-alloyed stainless steel and sealing materials conform with the product

**FOAM PRODUCTION**

The market of foamed products in the field of chemistry, pharma and food has heavily increased over the last few years. This not least because through the foaming process various product features can be adapted easier to modern trends and the quality and life time has considerably increased. In collaboration with the ETH Zürich KINEMATICA has brought to the market a new generation of foam processors with the series of MEGATRON FM.

A striking feature of this series is the generation of smallest micro bubbles in the scale of 5 - 10 µm and its narrow distribution due to a brandnew rotor stator geometry. The extremely effective foam processor MEGATRON FM works constantly and is available in different versions for laboratory and pilot plant size for product and recipe development with some liters throughput and in various sizes/performances for the production up to several 1000 liters throughput considering different working and environmental conditions.

We are happy to provide you with professional advise and to offer you all desirable accessories e.g. metering pumps with premixing container and mixer, cooling aggregate, process control. Some typical applications in food are: foamed protein, foamed milk products, foamed ice cream, mousses, foamed confectionary, bread pastries and foamed filling products.
POWDER INDUCTION

</tbody>
</table>

After several years of development KINEMATICA succeeded in introducing to the market an extremely efficient powder dispersing machine with the series MEGATRON MT-VP.

Advantages of the new developed system are above all, that due to a strongly improved suction capacity unwanted lumps can be avoided during powder sucking and wetting; this averts for one thing a plugging of the powder supply line and improves at the same time the add-on homogeneous dispersing.

The generated high vacuum with a simultaneous high suction capacity is substantially independent of the liquid throughput and to a certain extent, also independent of the pressure at the outlet; this grants a dust-free incorporation into the liquid. It has been shown that the generateable suction capacity is sufficiently high that heavy powders, e.g. metal containing powders, can also be sucked in.

So enlarges the new MEGATRON MT-VP powder dispersing machine with its convective powder wetting system and a wide range of various dispersing generators the application in the field of chemistry, pharma and food.

The series includes at present six various sizes with a throughput related to water and depending on the used dispersing generator from approx. 1’000 l/h to 80’000 l/h.

KINEMATICA offers also a range of complete homogenizing and mixing plants for different applications in the chemical, pharmaceutical, cosmetical and food industry - known under the brand name REACTRON®.

REACTRON® systems are designed to customer specifications and consist normally of the following components: processing tank with POLYMIN®/stirring system for macro mixing, POLYTRON®/MEGATRON® homogenizing system for down sizing and micro mixing, piping, process control and further specific equipment like vacuum pumps, heating / cooling thermostats in accordance with the customer, the product and the process.

REACTRON® systems are available for batch and semi-batch operation with volumes starting from 1 liter up to several 100 liters. They can be designed and manufactured according to customer and application specifications, incl. pressure / vacuum, CIP / SIP, clean room design and ATEX regulations.

Some application examples:
- Producing of cremes, lotions, emulsions
- Pharmaceutical or cosmetic products
- Dispersing of fine solids into a liquid or molten phase
- Suspending of additives and solid polymers in mineral oils
- Wet milling and dispersing of solids, fibers, stringy materials, tissues, cells into fluids and polymers
- Producing of diary products and diet food
- Polymerisation
- Extracting of enzymes from biomass
- and further more...

### Technical specification

**Type MTG 30/4F generator**
- Standard modell, available for systems MT 5100
- Rotor/stator with two teeth rows each

**Type MTG 40/2G generator**
- Standard modell, available for systems MT 5100
- Rotor/stator with one teeth row each

**Type MTG 40/4M generator**
- Standard modell, available for systems MT 5100
- Rotor/stator with two teeth rows each

**Type MTG 40/6F generator**
- Standard modell, available for systems MT 5100
- Rotor/stator with three teeth rows each

**Type MTG 40/6F generator**
- Special modell, available for systems MT 5100
- Rotor/stator with three teeth rows each
The lab stirrers POLYMIX® PX-SR 50 E and PX-SR 90 D are suitable for different mixing and stirring tasks in the lab thanks to powerful drive units with high torque and stepless speed regulation.

In addition the PX-SR 90 D is designed with a digital regulation with LED display and a changer for the rotating direction. The stirrers can be equipped with different stirring tools like propeller stirrer, turbine stirrer, anchor stirrer, flat stirrer, dissolver, potter, etc.

The lab mill POLYMIX® PX-MFC 90 D with exchangeable milling attachments and sieves with mesh sizes from 0.2 to 6 mm is suitable for all dry milling applications in the lab. Thanks to the powerful drive unit with LED display and high speed level the mill can process dried, non-fatty, hard and brittle products such as Cereals, corn, roasted coffee, beans, bones, stone, mortar, etc., as well as dried, non-fatty, stringy and ductile products such as Wood, leaves, straw, dried degreased meat, wool, cotton, paper, synthetic materials, etc.

The systems MICROTRON® MB 550 and MB 800 are specially designed for mixing, dispersing, homogenizing, emulsifying and size reduction of cuttable materials. The MB 550 is available with different attachments made from glass for volumes between 125 and 1000 ml. The MB 800 is available with mixing attachments made from stainless steel with volumes of 2 l and 4 l. The systems MB 550 and MB 800 are safety laboratory devices – grounded, double safety isolated, radio screened. A safety system prevents uncontrolled starting and therewith personal injuries.

The systems POLYMIX® PX-MIX® PX-SR 50 E – PX-SR 90 D are suitable for different applications, e.g. powders, pastes, emulsions, emulsifying and size reduction of cuttable and non-cuttable materials such as Wood, leaves, straw, dried, non-fatty, hard and brittle products such as Cereals, corn, roasted coffee, beans, bones, stone, mortar, etc., as well as dried, non-fatty, stringy and ductile products such as Wood, leaves, straw, dried degreased meat, wool, cotton, paper, synthetic materials, etc.

### POLYMIX® Stirrer

- **Stirrer with 3 blades, favourably to flow**: Top-down and bottom-up suction of the fluid. Low shear forces.
- **Standard stirrer, Ø 30 mm for PX-SR 50 E / PX-SR 90 D**
- **Maximum Speed**: 2000 rpm
- **Working volume**: up to 25’000 ml

### Applications

- Radial flow: Top-down and bottom-up suction of the fluid. High turbulence, high shear forces, particle crushing.
- Flat stirrer: Two blade stirrer. Open up at increasing speed. For stirring in round bottles with small bottle neck. Acts like a propeller stirrer.
- Tangential flow, high shear rates in the border area. Few dispersions at the vessel wall. Use at low speeds. Ideal for fluids with middle to high viscosity.
- Consisting of a mortar (bo-nisolk glas) and a pestle (PTFE). For homogenizing smallest amounts of tissue, pulping of cells and bacteria. No additional fluid necessary.

### Other Models

- PX-SR 50 E / PX-SR 90 D
- PX-SR 90 D
- PX-MFC 90 D

| PX-MFC 90 D            | 300 ml (funnel)   | 6'000 rpm  | 1000 W | - Milling chamber with attached funnel and rotary slide for product inlet; intercepting tubes and NS29 vessels can be attached to milling chamber outlet  
- Milling chamber can be equipped with hammer grinding or blade grinding attachment  
- Grinding attachments can be exchanged  
- Milling chamber can be equipped with sieves in different mesh sizes from 0.2 up to 6 mm  
- Milling chamber parts in contact with the product are made from stainless steel hardened  
- Packing unit consists of drive unit with milling chamber, grinding attachment, sieve 2.0 mm and tool set |
|                        |                   |            |        |                                                                  |
| MICROTRON® Mixers      |                   |            |        |                                                                  |
| MB 550                 | 125 - 1'000 ml    | 14'000 rpm | 550 W  | - 550 W high temperature safe universal motor with fan  
- Speed variable from 600–14 000 rpm, soft start, speed scale  
- ThermaL drive safety switch, electronic surveillance and stabilisation of the speed  
- Safety regulation for attachment surveillance, grounded with extra double safety isolation, radio screened  
- Mixing attachments made from glass available for volumes 125, 250, 500 and 1000 ml (safety huts to be ordered separately) |
| MB 800                 | 2 l - 4 l         | 14'000 rpm | 800 W  | - As above but 800 W high temperature safe universal motor with fan  
- Mixing attachments made from stainless steel for volumes 2 and 4 liters |

### Hammer grinding attachment
Consisting of rotor with 3 impact hammers and stator with place for one exchangeable sieve

- Maximum Speed: 50 - 6'000 rpm
- Working volume: approx. 300 ml (funnel volume)

### Blade grinding attachment
Consisting of rotor with 3 attached blades and stator with place for one exchangeable sieve

- Maximum Speed: 50 - 6'000 rpm
- Working volume: approx. 300 ml (funnel volume)

### Sieves
Available with mesh sizes from 0.2 mm up to 6 mm, for PX-MFC 90 D

### Mixing attachments
Consisting of mixing head and vessel from glass (MB 550) or stainless steel (MB 800), safety huts for MB 550 mixing attachments to be ordered separately

- Maximum Speed: 600 - 14'000 rpm
- Working volume: 125, 250, 500, 1000 ml (MB550) 
  2000, 4000 ml (MB800)

### Applications
- The impact grinding mill attachment is designed for processing dried, non-fatty, hard and brittle products such as:
  - Cereals, corn, malt, pectin, raw & roasted coffee, beans, oats, nuts, shells, bones, fins (fish), gravel, stone, amber, mortar, etc.
- The blade grinding mill attachment is designed for processing dried, non-fatty, stringy and ductile products such as:
  - Wood, bark, roots, leaves, straw, cork, dried fruits, dried degreased meat, adenoids, fish, feathers, leather, dermis, wool, cotton, leashes, paper, coal, turf, dried resins, synthetic materials, fibre glass, plastic pellets, different textiles, felt, etc.

- Dispersing
- Homogenizing
- Emulsifying
- Milling of cuttable materials
YOUR APPLICATION IS OUR FOCUS!

KINEMATICA is a leading manufacturer of dispersing and mixing technology for standard and customized applications in the lab, pilot plant and production areas of pharmaceutical, chemical, food, cosmetic and biotech or life science companies worldwide.

Our POLYTRON® batch and MEGATRON® In-line Homogenizers are suitable for many applications:

- Dispersing of non-soluble liquids or solids into liquids to finest emulsions/multiple emulsions or suspensions
- Induction and dispersion of powders into liquids
- Foaming by gas induction into liquids
- Disintegration of tissue samples for preparation in further analysis
- Dispersing of various samples for quality control

We also deliver POLYMIX® Micro Dry Grinding Mills and a variety of POLYMIX® and MICROTRON® Overhead Stirrers and Mixers.

Whatever your application, we are confident that our team of specialists, with over 60 years of experience, will provide the best solution for you.

YOUR SATISFACTION IS OUR GOAL!
